Disclaimer: In the absence of confirmation by device specification sheets, ES&S Solutions GmbH takes no responsibility for any defects that occur in equipment using any of ES&S's devices, shown in catalogs, data books, etc. Contact ES&S in order to obtain the latest device specification sheets before using any ES&S's device. ES&S reserves the right to make changes in the specifications, characteristics, data, materials, structures and other contents described herein at any time without notice in order to improve design or reliability. Contact ES&S in order to obtain the latest specification sheets before using any ES&S's device. Manufacturing locations are also subject to change without notice. Observe the following points when using any device in this publication. ES&S takes no responsibility for damage caused by improper use of the devices. ES&S's devices shall not be used for equipment that requires extremely high level of reliability, such as: -Military and space applications -Nuclear power control equipment -Medical equipment for life support

not only multilayer - but also multicolor!

BESCHREIBUNG

The biggest part of the printed circuit boards is colored green as a standard. In some applications it would be useful to choose a different colored solder mask.

Examples:

- for a better distinction of the sample – and serial production
- where LEDs are operated (recommendation: black and white PCBs due to light reflection)
- PCBs are a matter of design as to the end product
- PCBs should reflect the corporate identity

If you have already taken this idea into consideration do not hesitate to contact us.

With the help of our Far Eastern suppliers we can offer you a wide range of colored solder masks. Among others we can offer you the following colors: orange, red, blue, black and white.

Your company logo can also be integrated with the assembly print upon request.

You require a color which is not listed? You would like to include your company logo in your PCBs?

Just contact us! We would be glad to assist you!
