ES&S's devices shall not be used for equipment that requires extremely high level of reliability, such as: -Military and space applications -Nuclear power control equipment -Medical equipment for life support

BESCHREIBUNG

ES&S und unsere Lieferanten produzieren Leiterplatten grundsätzlich nach UL Wiring, Printed - Components ZPMV2.

Unsere Leiterplatten werden generell nach einem UL zertifizierten Prozess gemäß ZPMV2 und Brandschutzklasse UL94/V0 gefertigt. Das bedeutet, dass die Leiterplatten für UL zugelassene Endprodukte eingesetzt werden können. Der Vertrieb in die Vereinigten Staaten stellt somit kein Problem mehr da.

Um unseren Kunden so viel Komfort wie möglich zu bieten, haben wir uns dazu entschlossen, unsere Lieferanten genauestens zu prüfen und sie speziell für unsere Anforderungen bei UL zertifizieren zu lassen.

Das Aufbringen der UL Nummer, sowie des Date Codes ist bei Produktionen in Fernost grundsätzlich kostenlos.

UL (Underwriters Laboratories) ist eine unabhängige Organisation, die Produkte hinsichtlich ihrer Sicherheit untersucht und zertifiziert.

UL prüft Produkte, Komponenten, Materialien und Systeme dahingehend, ob sie spezifischen Ansprüchen genügen. Wenn dies der Fall ist, dürfen diese Erzeugnisse das UL-Prüfzeichen tragen.

Diese Standardeinhaltung der UL Norm in unserem Unternehmen wird vierteljährlich überprüft und damit sichergestellt, dass die verwendeten Materialien gelistet und nachverfolgbar sind.
