

## DATENBLATT

### PCB assembly

## BESCHREIBUNG

We can assemble, we can solder, we can cast, we can assemble, we can test, we can ESD, we can precise, we can fast, we can quality, we can assemble according to your wishes!

Here we would like to introduce our printed circuit board assembly to you. Get an impression of our assembly possibilities and service offers.

Would you like to have printed circuit boards assembled to customer specifications? ... We know what we are doing - benefit from our:

Know-how for complex boards,  
our variety of printed circuit boards,  
a design suitable for production,  
most modern production facilities and  
our customer-specific service!

We also offer our circuit board assembly in small series. In addition, you can also take advantage of our fast prototype assembly. For more information, please visit our [PRINTED CIRCUIT BOARD ASSEMBLY \(PCBA\)](#) website.

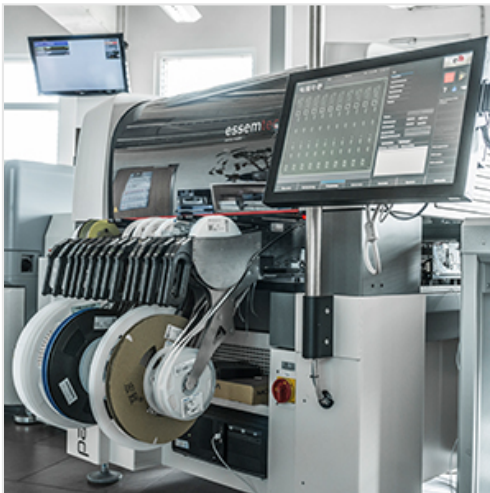

Our services of printed circuit board assembly:

- electronic production of prototypes, small series or medium series
- demand-oriented procurement of printed circuit boards, components or their storage
- printed circuit board layout (PCB layout), CAD and CAM
- single & double-sided printed circuit boards, multi layer, flexible and rigid-flexible printed circuit boards
- printed circuit board surfaces that we can process: HAL lead-free, electroless nickel-gold plated (ENIG), electroless tin plated, OSD
- housing and device mounting
- casting technology for components
- device assembly, mechanical processing
- washing and cleaning of assemblies (removal of flux residues)
- ESD compliant packaging, logistics

- individual lot sizes are possible
  - printed circuit board assembly:
    - surface mount technology (SMT), surface mounting
    - through hole technology (THT), push-through mounting
  - we orient ourselves on the following quality guideline or rather acceptance criteria:
    - IPC-A-610** - acceptance criteria for electronic assemblies
    - IPC-J-STD-001** - requirements for soldered electrical and electronic assemblies
    - IPC-7711/21** - rework, modification and repair of electronic assemblies
    - IPC-A-600** - acceptance criteria for printed circuit boards
    - IPC-6012** - rigid PCB qualification and performance specification
- RoHS compliant

Disclaimer: In the absence of confirmation by device specification sheets, ES&S Solutions GmbH takes no responsibility for any defects that occur in equipment using any of ES&S's devices, shown in catalogs, data books, etc. Contact ES&S in order to obtain the latest device specification sheets before using any ES&S's device. ES&S reserves the right to make changes in the specifications, characteristics, data, materials, structures and other contents described herein at any time without notice in order to improve design or reliability. Contact ES&S in order to obtain the latest specification sheets before using any ES&S's device. Manufacturing locations are also subject to change without notice. Observe the following points when using any device in this publication. ES&S takes no responsibility for damage caused by improper use of the devices. ES&S's devices shall not be used for equipment that requires extremely high level of reliability, such as: -Military and space applications -Nuclear power control equipment -Medical equipment for life support
