

ES&S Newsletter EN 37 2014

ES&S Know-how for your success at the Electronica 2014!

The Electronica 2014 the world's leading trade fair for components, systems and applications - will take place in just 9 weeks time. You still require samples for your exhibits at the fair? Just contact ES&S Solutions!

Our flexible production processes enable us to deliver high quality samples and preproduction parts. Due to the great demand of the industry the lead time for our products is actually increasing. Therefore we kindly remind you to place your order in time to make sure that we can meet your requirements.

Our company founded in 1991 takes the responsibility for the entire processes from the development of cable layouts to the shipment of products ready for distribution. We place great emphasis on an expert advice to our customers before, during and after the manufacturing of the required products.

As a cross product supplier in the electronic industry cable assembly is one of our core businesses. Even though the electronic industry tried to decrease the variety of interfaces and to down size the components during the past few years the variety of connectors and cables could not significantly be reduced. Thus the specialization of transmission characteristics results in a large variety of combinations.

Find out more about us, our services and our know-how.
